

Sheathed type resistance temperature detector

Model : R220 series (R series)

Spec. sheet no. RD02-03

Service intended

Sheathed type RTD is constructed in a way that monolithic resistance element is connected with MI cable (MgO compacted metal sheathed lead wires), and has a longer life and a fast response time.

High purity white gold resistance wire is used to perform with a better accuracy.

Except the end tip length of 60 mm, it could be bent 2 times more than its out diameter so can be used in the process pipe where it is not easy to install due to the obstacles exist around the installation site.

Industrial bimetal thermometer

Model : T110

Spec. sheet no. TD01-01

Service intended

Bimetal thermometer is used for measuring temperature of gas or fluid. It is suitable for measurement, regulation, and direct monitoring for the fluid. It meets the most stringent criteria on resistance to a corrosive atmosphere and exceptional climatic circumstances.
